

IZA Teaching Program

Although IZA is not required in principle to offer a teaching program, it is committed to supporting academic training at the University of Bonn through its research associates and visiting scholars. The weekly IZA research seminar is open to students, Ph.D. candidates, and external scientists. If possible, IZA also opens its library to external users.

Bonn Graduate School of Economics

With the support of the Deutsche Post AG, the Bonn Graduate School of Economics (BGSE) was founded in the fall of 1998 at the University of Bonn. A limited number of Ph.D. candidates are given the opportunity to participate in a three-year intensive program of study including a stay abroad. IZA is closely integrated in the program of the BGSE and offers courses in econometrics and labor economics.

IZA Teaching Program

European Summer School in Labor Economics

As part of its academic program, IZA hosts an annual "European Summer School in Labor Economics". Thereby IZA aims at assembling a larger number of up-and-coming junior scientists from all over Europe and distinguished researchers in the field of labor economics. While the latter give lectures on their own research focus and on the most recent scientific methods, Ph.D. students are offered the opportunity to present their own work in front of a larger and competent audience.
